

Letter of Recommendation

To whom it may concern,

I am delighted to write this letter of recommendation on behalf of Cameron Perret. It has been my pleasure to work with Cameron for the last year in maintaining and ensuring the operations of the United Financial Management System onsite of a federal client.

Cameron is a reliable cross-team player who exhibits an exceptional willingness to learn new ideas everyday. This has allowed him to take on challenges that go beyond daily operations and maintenance and assist more senior team members with their responsibilities. In turn, he has been provided opportunities to work on mission critical assignments under high client visibility, succeeding at each turn.

While Cameron seeks to expand his knowledge of the system and business by pursuing dynamic issues, he is well-known to provide friendly support for tasks of all levels across different teams on the project. Oftentimes, this has involved training and giving guidance to other team members of various skill levels and seniority. It should be noted that Cameron demonstrates a balance in knowledge sharing and allowing teammates to improve their independent learning skills, with respect to the situation and any time sensitivity.

Cameron's rapid advancement into difficult and urgent assignments is the reason why we have been able to work on a number of items together. As I am the system integrations specialist from the Development team, there are locations and actions in the Testing and Production environments I am not allowed access to. Cameron has been a constant asset to my daily responsibilities, which involve web service maintenance and ensuring uninterrupted traffic with external interface partners. When an issue arises, he is there to relay findings across the system environment and assist in troubleshooting. Once the steps to resolve are identified, he diligently sees them through implementation.

Receiving Cameron's extraordinary assistance and well-developed analysis is a shared experience across the project. The amount of skills and knowledge he was able to accumulate in such a period of time is truly remarkable. That is why I confidently recommend him for your employment.

Sincerely,

Madeline Blythe
webMethods Development Lead
